

AP Computer Science A

Summer Assignment

The purpose of the AP Computer Science (AP CSA) summer assignment is to give students a brief introduction to what they will be learning in class throughout the coming school year. Don't worry if you have never programmed. AP CSA will teach you how to code in Java. This assignment is completely optional but will provide a good foundation for this course.

- To learn a little Java before the class begins, follow this link (<https://www.codecademy.com/learn/learn-java>), create a free account, and start learning.

Over the summer, I usually check emails weekly. If you need anything or have a concern, please email me at swooddell@oxfordasd.org.

Have a great summer and I am looking forward to seeing you in late August.
